

CryoSkin

CryoSkin

Cryo-who? What is it?

Cryoskin works by using thermal shock (alternating warm and cold) to destroy body fat. We use this science to provide slimming, cellulite, and facial treatments with incredible results.

Usually, it takes an average of 5-10 sessions to get optimal results, depending on the area of the body being targeted and the amount of tissue in the area- please do not book any CryoSkin sessions before you have an individualized consultation with our staff, so we can be sure you are an ideal candidate. **Book your consult TODAY! 404-565-1079**

This is a per area treatment- pricing is per area, most times we tackle 1 area at a time, there are a few exceptions- talk to us during your consultation about your needs (immediate and future).

Lymph and Circulation Pressure Massage \$100

Also known as compression therapy or lymphatic drainage. This 40 min. treatment stimulates your lymphatic system by compressing and decompressing a specific part of your body, helping you get rid of toxins and excess fluids. This helps reduce liquid retention, bloating, improve blood circulation and battle cellulite, and process fat more efficiently while being a fast and enjoyable treatment. You will love this treatment!
