Advance Weight Loss Treatments:

These services series are very highly recommended. Talk to your Aesthetician.

Our office offers treatments that do what exercise has trouble doing—spot-treat the fat in problem areas. Non-invasive treatments tighten skin and reduce stretch marks with a combination of radiofrequency and magnetic pulses. Other treatments, such as ultrasonic-cavitation treatments, shrink fat cells with localized ultrasonic waves while firming skin to ward off cellulite. The noninvasive Laser Lipo treatments do the same. To complement the surgery-free weight-loss treatments, Well Kneaded's Med Spa beautifies clients with luxurious facials, treatments, and other Bodywork.
